KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Buy, Read, Enjoy!Von KaterinaThis book was hibernating on my kindle since the end of May this year, when I got it from as a freebie...I must admit, I am one of those hoarding-freebies-type... downloading, downloading 'til no end, then indecisive what to read next.So when the author was looking for reviewers on goodreads some days ago, I offered my

services only to find out, I already had it on my e-reader....but did not recognize it because of the different cover!My review will be honest nonetheless!!!It took me some time to wrap my head around this book...but don't get me wrong!Once I started reading it, I couldn't put it down.It has all the ingredients one is looking for in an erotic romance.An engaging storyline, a perfect male, steamy sex scenes, even some lovely poems here and there, with which the hero expresses his emotions towards the heroine...and witty banter! I love witty banter and this book provided it!I also loved that they talked during their most intimate moments and it wasn't just the usual "Ohhh's "and "Ohhh my God" but the talking emphasized the insecurities the female character was facing.I would have given this book a 5-star rating, but the heroine was a tad too annoying...always pointing out her flaws as though she was constantly fishing for compliments...and too whiny.But the male character could more than compensate this weaknesses!As a side note: my copy of this book had really a lot of typos, missing words, misspelled words and even an inconsistency regarding the age of the heroine's son.But let's not forget that this is a debut novel and the storyline makes you look past them!
