Submissive Cinderella and the WolfVon MagritteSinful Ella and the wolf is a nice kinky erotic short story (approx. 80 pages), set in a fairy tale background.Ella, after her parents death works as a servant for her two half sisters (reminds you of Cinderella? me too). Her sisters however are very erotic creatures, forcing Ella to "serve" serve them erotically as well, but she is never allowed to find her own release.Jarrood, Prince of Frey, is a werewolf, a small problem not

even his father knows of, but also the future king and has therefore some obligations such as not being a werewolf and finding a woman to marry, but unwilling to mate, not wanting another human to risk becoming an animal like himself. Until he is drawn to a small house where he catches a glimpse of Ella, his wolf being attracted to her. How both will handle their attraction and duties you will discover reading this story. It is a nice erotic fairy tale, with submission, ménage, lesbian and heterosexual relations, animal and romantic relations, what I enjoyed the most is that one has the time to get a real understanding of the characters' needs and fears and is not simply pulled in a porn story. A nice read for a "hot" afternoon. Enjoy the read MBMT
