KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Lovely romance with profoundnessVon QuerleserTaiko and Duncan don't have much in common, so it's no surprise that their

relationship starts out as a pure sexual one. But getting to know each other and spending lots of time together they become friends. Or is it already love? The reader knows only Duncan's POV, but Taiko is a well developed character as well. The differences of their upbringing, their different nationality, culture and moral values are only few of many challenges for their growing relationship. Prejudices, mistrust and enemies all around them don't make their situation easier. But without noticing Duncan falls deeply in love and all their problems mellow in one: is it possible to plan a future together when their countries are more enemies and one of them will always be the foreigner? The story of Duncan and Taiko is well developed, there are no big surprises and most turns are expected. But even without much action, the author manages to write full of suspense. The differences in culture, society and moral values are well described without boring descriptions. Just the interactions let the reader learn more than long descriptions. The characters are well developed and it is nice that they are not only black and white, but lots of grey as well. Duncan and Taiko could have spared themselves lots of grieve with a few honest talks and less assumptions, but that only makes them more human. A little "flaw": In this world don't exist STDs. Though it seems like an Asian and American society of the 1980 or later (there are cars, phones, computers, but no mobile phones etc.), condoms are obviously not necessary. If you don't seek a shallow story with lots of porn-like sex and a rushed HEA, but prefer authentic characters and colourful worlds, this is the perfect story.

Kurzbeschreibung In a country dominated by a war that has lasted for decades, all Duncan Harding ever wanted was a quiet life, running the garrison that has been commissioned to his family for generations. But his aspirations came to a sudden end when he was expelled from the Military Academy seven years ago. Now he is unexpectedly given the chance to return for a price. Seventeen-year-old Taiko Camlyn is the heir apparent to the leadership of his home country, and the Academy's newest recruit. Spying on the youth should be a piece of cake for a man like Duncan. But Taiko turns out to be far removed from Duncan's expectations and his assignment proves to be more insidious than he ever imagined. Caught in a tangled web of deceit and emotions he could never have anticipated, Duncan has to make decisions that will change his life forever.
