happy ending is a nicely told romance story with a bit of suspense, likeable characters, humour, and a good narration style. There are hardly any grammar errors or typos in this story (a big plus!), however, though I commend the author from inventing her own metaphors, I personally would have preferred she had stayed with the well known ones - some of hers actually made me snort, which I am sure was not the intention. Some very few times the choice between using an adverb or adjective was a bit unlucky as well. On the whole, however, I quite enjoyed reading this and would not mind to read the follow-ups and prequels to see what happened to the other characters.
